

## **Assignment 1**

Group 2

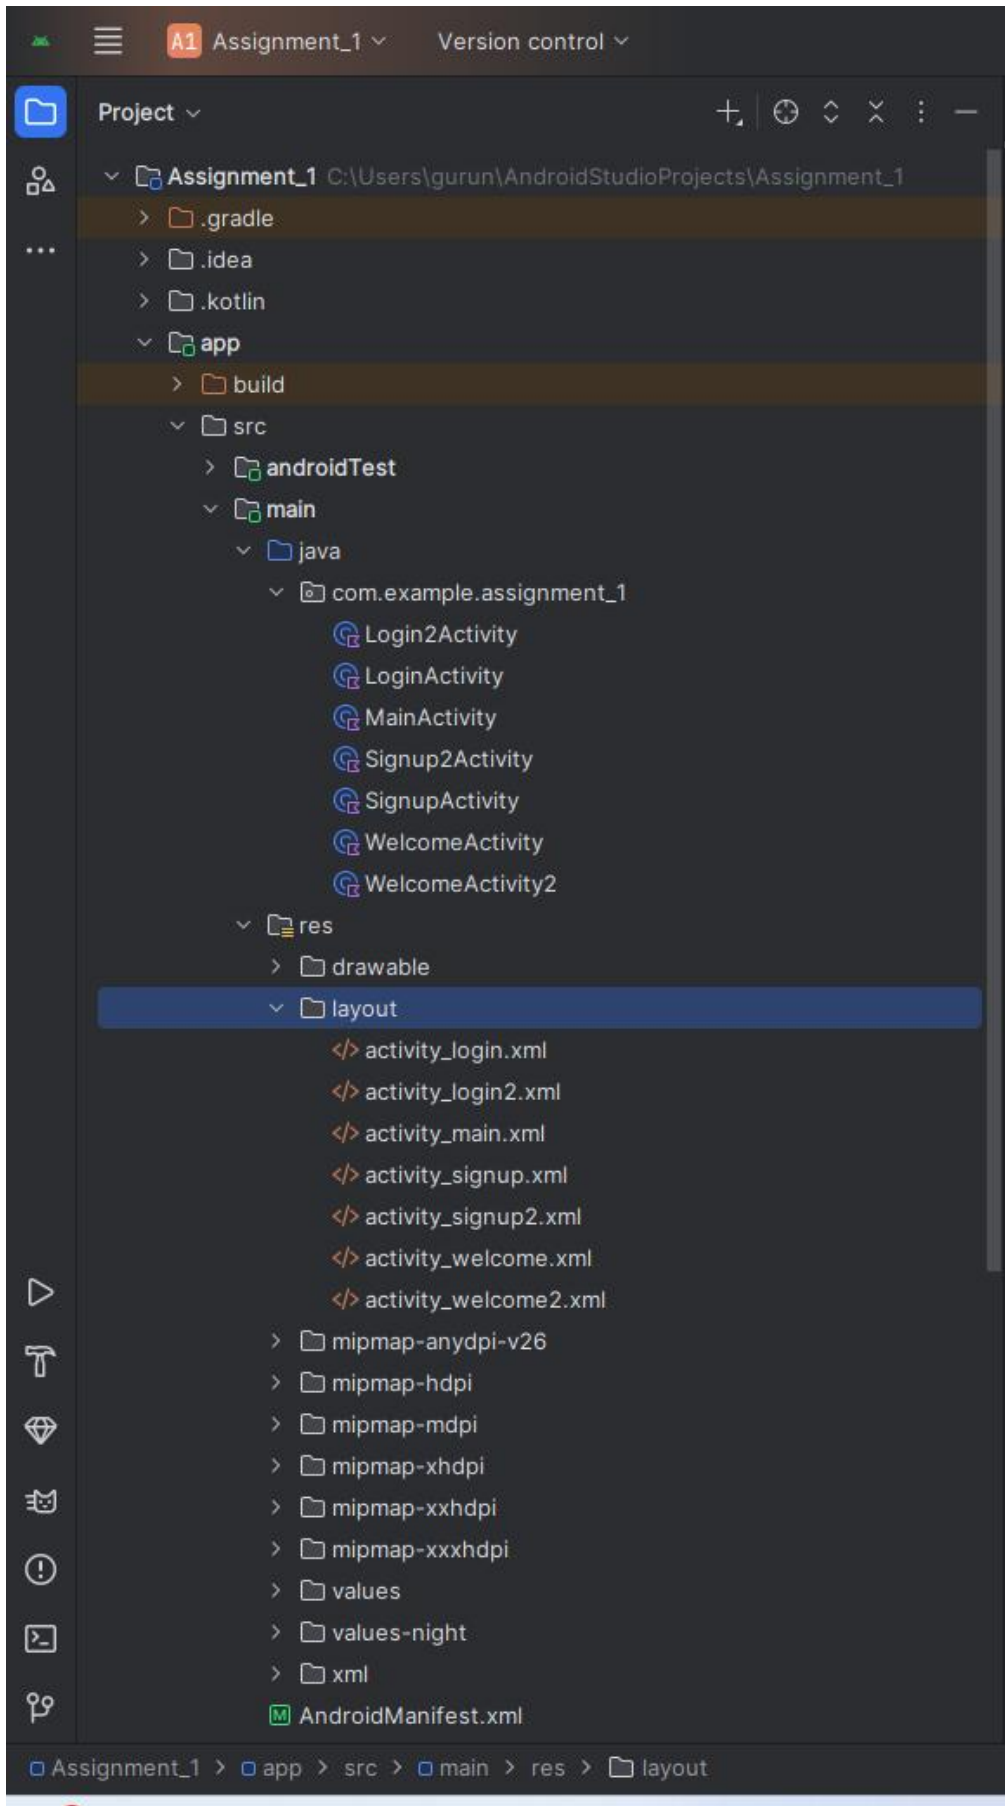

Computer Programming, Georgian@ILAC

COMP 3025: Mobile and Pervasive Computing

Mr. Youssef Rizk

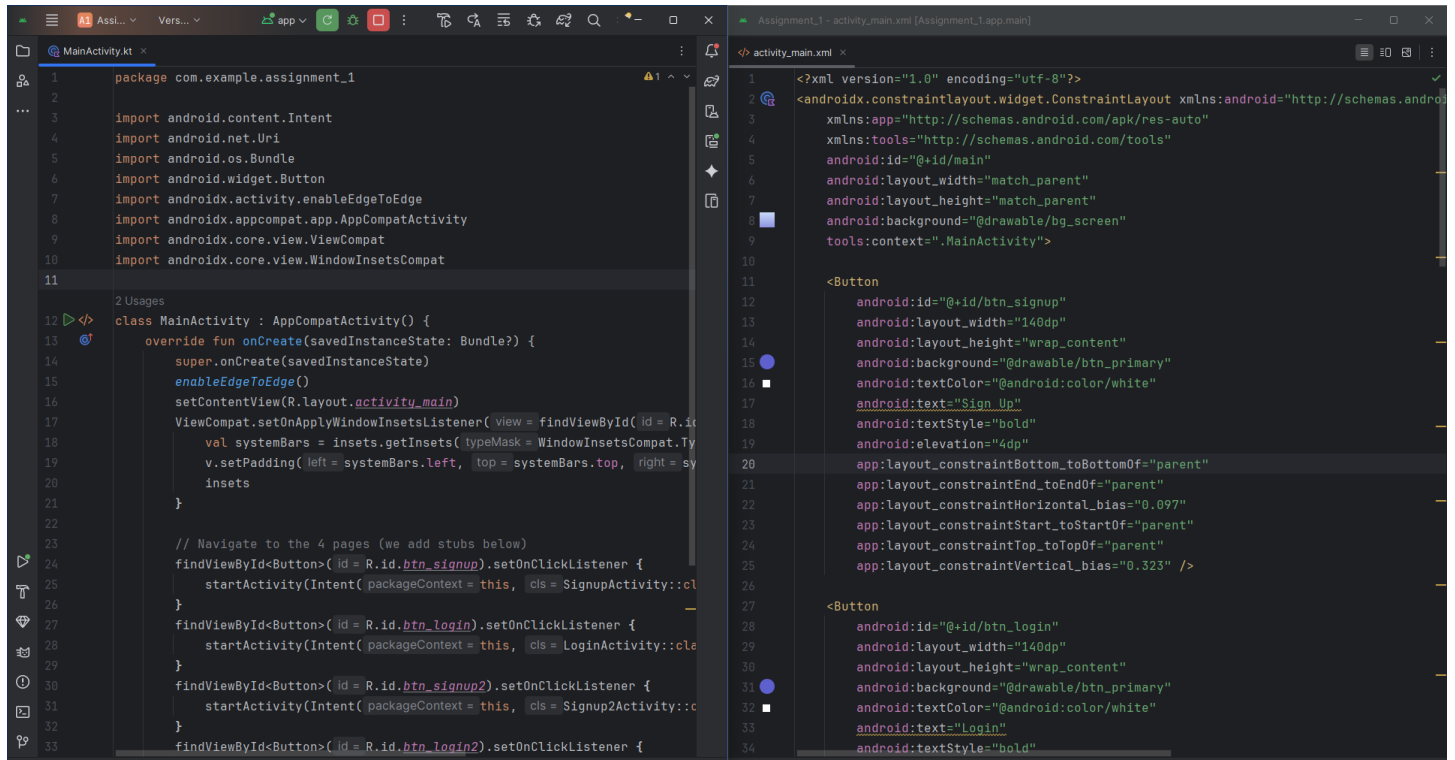

October 27, 2025

## Project Structure

# Kotlin files and respective XML files (Activity)

## 1. Main Page

The image shows a side-by-side comparison of Kotlin and XML files in an IDE. The left pane displays the `MainActivity.kt` file, and the right pane displays the `activity_main.xml` file.

**MainActivity.kt**

```
1 package com.example.assignment_1
2
3 import android.content.Intent
4 import android.net.Uri
5 import android.os.Bundle
6 import android.widget.Button
7 import androidx.activity.enableEdgeToEdge
8 import androidx.appcompat.app.AppCompatActivity
9 import androidx.core.view.ViewCompat
10 import androidx.core.view.WindowInsetsCompat
11
12 class MainActivity : AppCompatActivity() {
13     override fun onCreate(savedInstanceState: Bundle?) {
14         super.onCreate(savedInstanceState)
15         enableEdgeToEdge()
16         setContentView(R.layout.activity_main)
17         ViewCompat.setOnApplyWindowInsetsListener(findViewById(R.id.main)) { v, insets
18             val systemBars = insets.getInsets(WindowInsetsCompat.Type.systemBars())
19             v.setPadding(systemBars.left, systemBars.top, systemBars.right, systemBars.bottom)
20         }
21
22         // Navigate to the 4 pages (we add stubs below)
23         findViewById<Button>(R.id.btn_signup).setOnClickListener {
24             startActivity(Intent(this, SignupActivity::class))
25         }
26         findViewById<Button>(R.id.btn_login).setOnClickListener {
27             startActivity(Intent(this, LoginActivity::class))
28         }
29         findViewById<Button>(R.id.btn_signup2).setOnClickListener {
30             startActivity(Intent(this, Signup2Activity::class))
31         }
32         findViewById<Button>(R.id.btn_login2).setOnClickListener {
33             startActivity(Intent(this, Login2Activity::class))
34         }
35     }
36 }
```

**activity\_main.xml**

```
1 <?xml version="1.0" encoding="utf-8"?>
2 <androidx.constraintlayout.widget.ConstraintLayout xmlns:android="http://schemas.android.com/apk/res-auto"
3     xmlns:app="http://schemas.android.com/apk/res-auto"

## 4. Signup Page (Local)

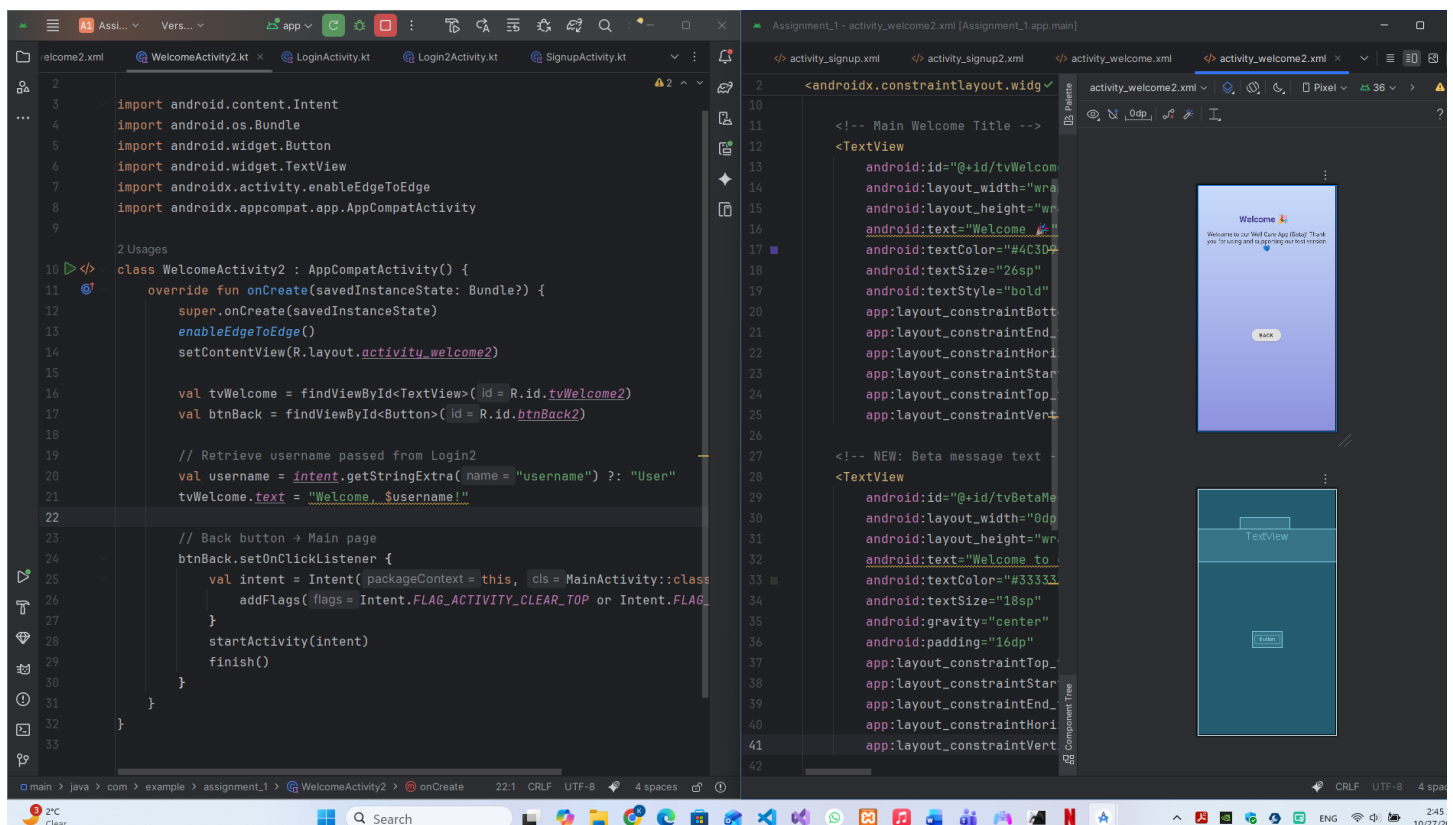

## 5. Signup2 Page (Firebase)

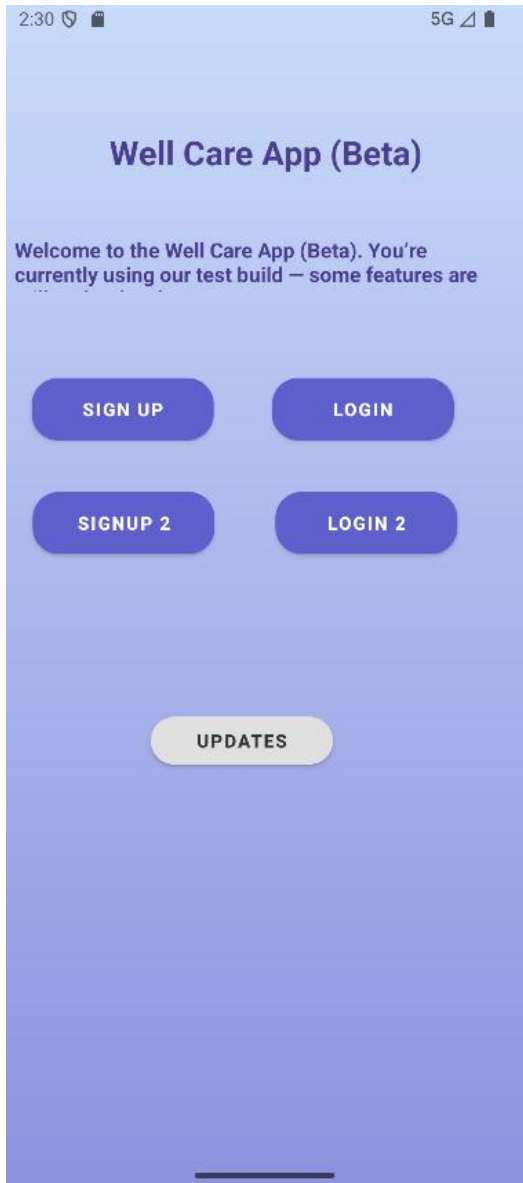

## 6. Welcome Page (Local)

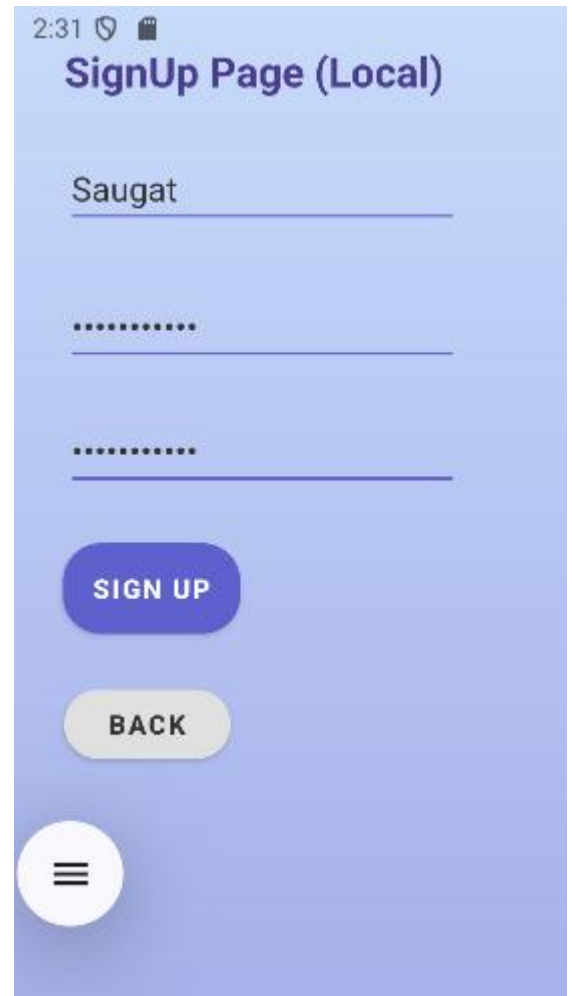

## 7. Welcome Page (Firebase)

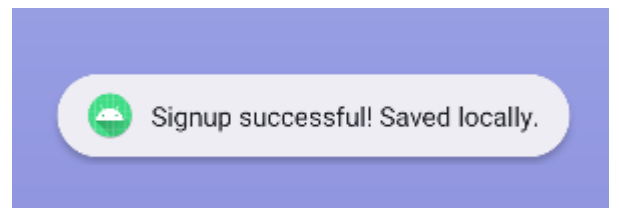

## Main Page

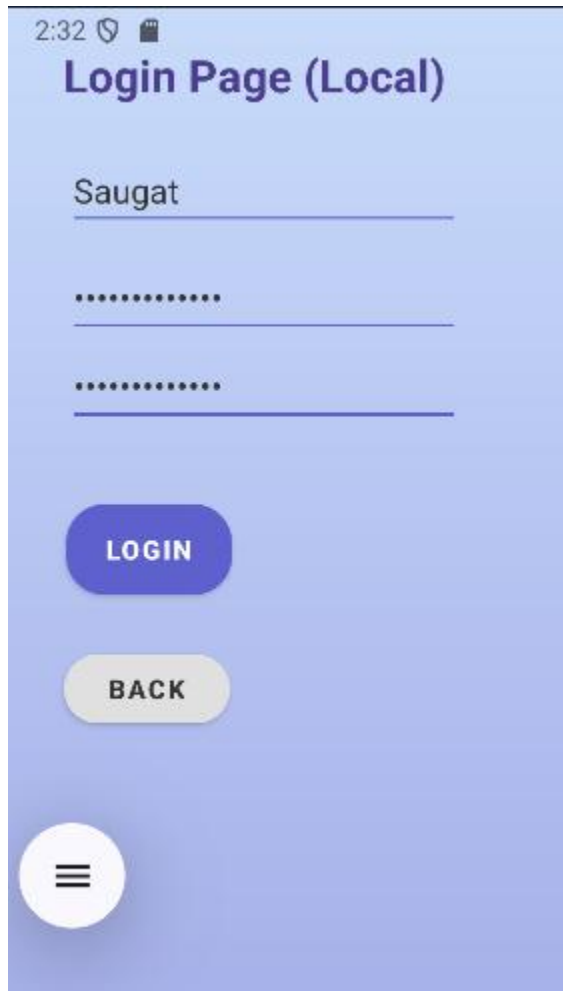

## Signup Page (Local)

When signing up, it will save locally in our computer

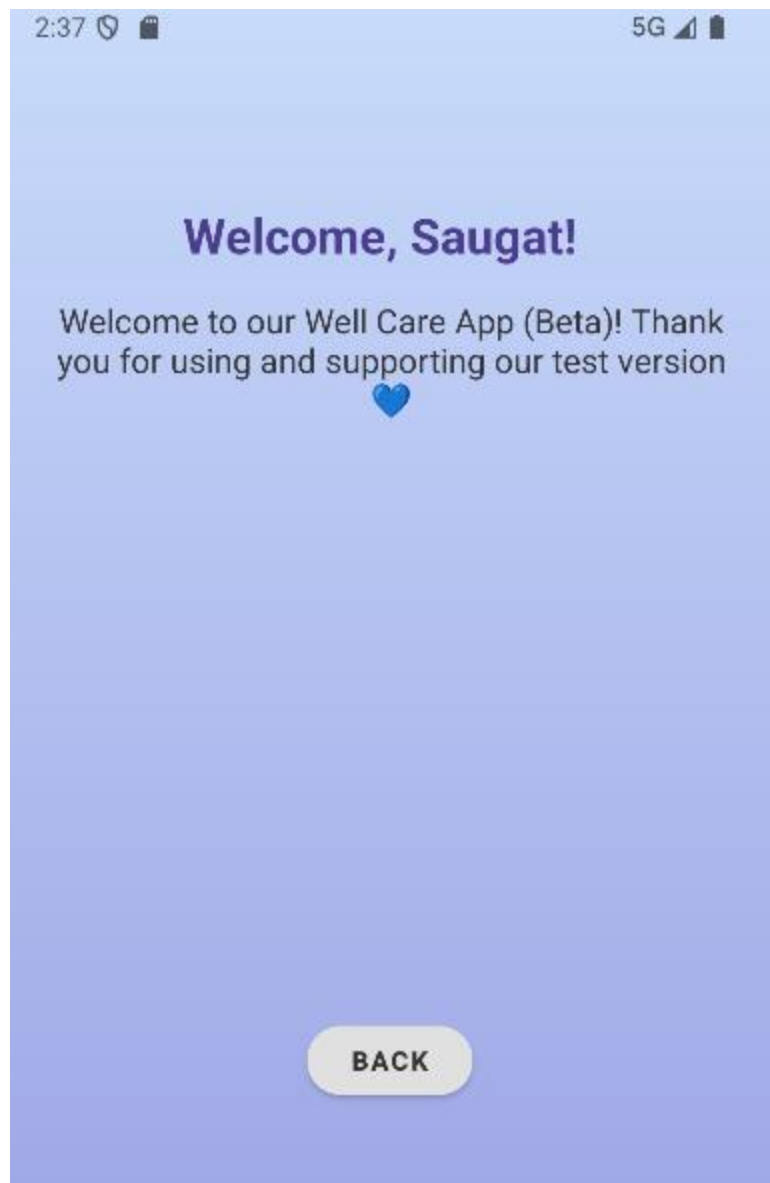

## Login Page (Local)

A screenshot of a mobile app's login page. The background is a solid light blue. At the top left, the status bar shows the time 2:32, a shield icon, and a battery icon. The title 'Login Page (Local)' is displayed in a bold, dark blue font. Below the title, there are two input fields: the first contains the name 'Saugat' and the second contains a series of dots representing a password. Both fields have a thin blue underline. Below the password field, there are two buttons: a blue rounded rectangle with the text 'LOGIN' in white, and a light grey rounded rectangle with the text 'BACK' in dark grey. In the bottom left corner, there is a white circular button with a black hamburger menu icon (three horizontal lines).

## Welcome Page (Local)

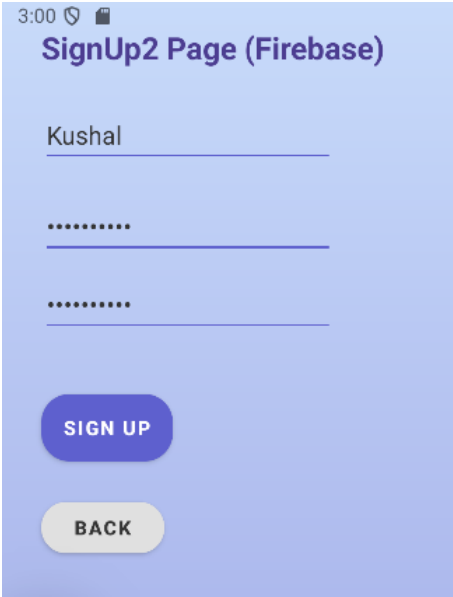

A screenshot of a mobile app's welcome page. The background is a solid light blue. At the top right, the status bar shows the time 2:37, a shield icon, a 5G signal icon, and a battery icon. The title 'Welcome, Saugat!' is displayed in a bold, dark blue font. Below the title, there is a paragraph of text: 'Welcome to our Well Care App (Beta)! Thank you for using and supporting our test version'. Below the text, there is a small blue heart icon. At the bottom center, there is a light grey rounded rectangle button with the text 'BACK' in dark grey.

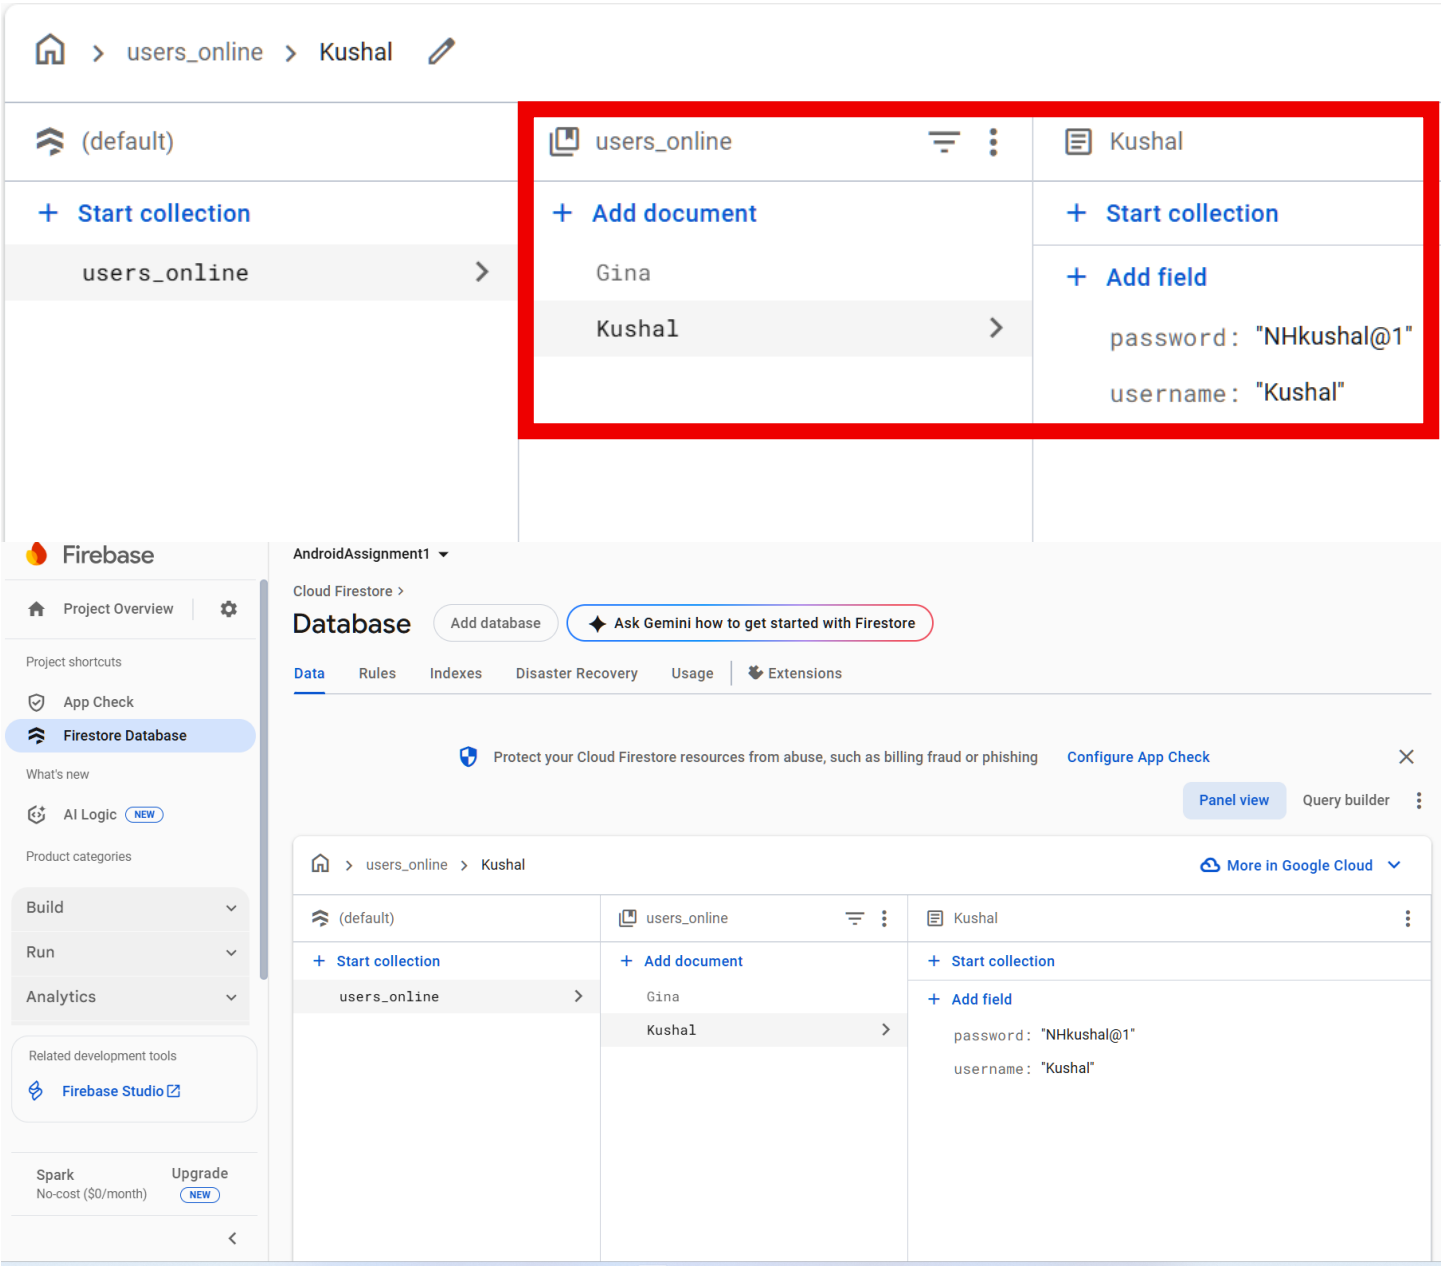

After successful login, it will lead to  
Welcome Page

# Signup2 Page (Firebase)

When signing up, the username and password will be saved on our Firebase database

## Login2 Page (Firebase)
